LINEAR SUPER-LED® LIGHTHEAD SERIES

NEW PRODUCT!

Officially Licensed
Warning Lights
of NASCAR®

The only patented Linear-LED® lightheads designed to stand-up to the harsh environments and standards of the industry while providing top of the line performance!

Features

- Surface mounted via two screws.
- Updated design allows for faster and easier installation.
- Super-LEDs provide unmatched high intensity warning, low current consumption.
- Unique lens shape is completely illuminated with patented Linear-LED designed reflector assembly.
- Lens and reflector are a sealed assembly. Lighthead is designed with mounting screws located outside of the sealed lens/reflector assembly, eliminating water infiltration.
- Replaceable light engine is accessed from the rear of the lens/reflector assembly.
- Rear gasket insures that the lighthead and optional flange do not make contact with the vehicle's surface.
- M9, M7, M6 and M4 lightheads have multiple Scan-Lock™ flash patterns available with many being California Title XIII compliant. Meets KKK 1822F, NFPA 1901, SAE and EC65 specifications.
- Available in Single or Split Colors.
- Choose patterns from solid, left/right, top/bottom, in/out, or diagonal sequencing.
- M9 and M6 available in a brake/tail/turn, back-up, scenelight or turnlight.
- Other patents pending.
- Whelen exclusive "NERM" (Non-Emergency Recognition Mode) is standard. Lightheads glow for instant emergency vehicle identification. Choose from five intensity levels to meet your exact needs.
- All M Series come standard with hard coated lenses which resist scratches, chemical and UV damage.
- **An Industry First**, M9 surface mount LED scenelight features inner optics that direct light downward without angle brackets.

Whelen Products are proudly made in the U.S.A.
